Intruder on Premise

Titan HST SOS Alert utilized to notify site administrators and security of an intruder jumping the fence to enter while people were present. Police responded immediately to the location of the SOS and escorted the individual off site.

Medical Emergency

Multiple incidents of seizures at various sites. Witnesses sent Titan HST medical alerts and were able to video stream the incident to site admin & emergency staff via Titan HST while simultaneously receiving information on what to do until help arrived. Administrators, each time, called an ambulance and used GPS to provide the person's exact location.

Storms & Floods

SOS Alerts used to communicate maintenance critical issues such as collapsing roofs. Broadcast Messages used to inform site members of dangerously flooded areas.

Missing Person

Many occasions of missing children and mentally challenged individuals. Administration broadcasts a photo of the missing person to all users in the immediate vicinity allowing them to quickly find and help the individual.

Power Outages

Titan HST is used on many occasions to communicate instructions and updates to all site members during power outages and network downtime.

Wildfires

Heavy usage during California Wildfires to warn people of safety issues and provide guidance to stay safe.

Bomb Threat

A Titan HST site received an emailed bomb threat during the National Bomb Threat Hoax in December of 2018. The staff member immediately notified admins of the threat. Via Titan HST site admin were able to evacuate the area and keep all site members up to date on the status of the bomb squad investigation. Panic was minimized due to quick and efficient communication.

Severe Wound

Individual stabbed in the chest on site. Staff member witnessed the incident and sent an SOS Alert notifying admins of the situation. Staff member was able to stay with the injured person while receiving medical instruction from their off-site nurse and waiting for an ambulance which had been called by Admins upon receipt of the SOS.

Assault

Site member assaulted at work. Admins used Titan HST SOS Alerts to communicate with one another and coordinate help for the injured worker. Police on Titan HST were able to locate the assailant via the SOS GPS location.

Weapon

Attempted gun and ammunition sale at a site. Witness sent a Titan HST SOS alert to admins. Police were reached instantly and the issue was resolved by police with no escalation.

Downed Power Lines

Titan HST SOS Alerts utilized to notify Admins. An admin then notifies the appropriate company to ensure quick repair while another admin simultaneously sends Broadcast Messages to inform site members of the issue and to keep the area clear.

Sexual Assault

College female was being sexually assaulted when she used an SOS Alert to request help. Notified users rushed to her aid and prevented progression of the sexual assault.

Police Pursuit

Law enforcement initiated Lockdowns to school admins. Admins were able to receive real time updates from police and relay the information to parents, students and staff until the incident was resolved.

Kidnapping

Custodial issue. Child removed from school by a parent who had their shared custody of the child revoked by the state. The chaos that ensued overtook the local landline switchboard. No calls going in or out were possible. Administrators used Titan HST for a group call until the parent was apprehended, and the child was found.

Suicide Attempt

Individual consumed a bottle of bleach trying to take their life. A Titan HST medical alert was initiated. Principal and nurse rushed to the room and took over the class. 911 dispatch center gave instructions on how to dilute the bleach ingested and sent paramedics directly to the room without having to go to the front office for directions because of the SOS GPS location. In this instance, Titan HST was able to reduce emergency response time, provide instruction to minimize the damage until help arrived and saved this individual's life.

Drug Overdose

Student took a large quantity of pills after school. Others found the student and used Titan HST SOS alerts to notify administrators and recently departed police officer. Admin and police gave direction and responded to the scene immediately. Without Titan HST, the response would not have been possible as the people would not have had the admin or police officer's number. Dialing 911 and waiting for a standard response would have been the only option, which the students were afraid and hesitant to do.

Violence prevention

Ex-Site member threatened a current site member's life. Administrators sent a broadcast message to staff with a photo and warned them of the situation and to comment back if they had any additional information. Ex-site member was seen attempting to sneak onto the premises. An employee sent a Titan HST SOS Alert on and the trespasser was apprehended by security and local law enforcement.
